Open the USB debugging on Huawei Y625 (Y625-U32) V100R001C567B103 773.23MB, plug in the phone to the PC and enable USB debugging. Method #2: If the file is too large for you to transfer, you can use a third party tool or update tool. Using the update tool (such as the one provided by My Phone Toolbox), you can also download it as a zip file and then update. Update tool for Huawei Y625 (Y625-U32) V100R001C567B108 791.01MB. Update tool for Huawei Y625 (Y625-U32) V100R001C567B105 701.70MB. Update tool for Huawei Y625 (Y625-U32) V100R001C567B103 773.23MB. Update tool for Huawei Y625 (Y625-U32) V100R001C328B105 701.70MB. Update tool for Huawei Y625 (Y625-U32) V100R001C328B108 791.01MB. How to flash Huawei Y625 (Y625-U32) V100R001C567B103 773.23MB flash file to Huawei Y625 (Y625-U32) V100R001C567B103 773.23MB firmware image. Note: The flashing file size is the same as the firmware image size. Android phones can be used for data transmission through different networks. You can use your Android phone to connect to the Internet through different Wi-Fi networks. Then, you can download the desired software updates. Via PC, download and install Google Chrome mobile. When the Google Chrome mobile is installed, you can connect the mobile phone to the PC through a USB cable. Connect the mobile phone to the computer and then select "File" > "Paste". Click "OK". The Android file transfer interface appears. Select the folder where you want to transfer the files. Click "Open". If there is an update available for the mobile phone, select "Android Update" on the desktop to begin downloading the software updates. The computer system automatically downloads the file. When the update is complete, the file transfer interface is automatically closed. Method #3: If you do not have a Android phone, then you can use another
