Here's a game that's set up and moves like a Final Fight cart, but handles and runs like a Street Fighter II game. It's also jam-packed with combos that...well, you all know. And you know, it would be strange if I didn't write "like Final Fight 4", and not because there is such a concept, but simply because the game really is like that. Well, you can already see it from the screenshots, and if you don't know what Final Fight 4 looks like, then you can't at all: And even though, according to all the canons of the genre, it has its own "character", like in Street Fighter V, and this game is still Street Fighter, only Street Fighter V. fffad4f19a
