April 15, 2018 - The company hasn't accepted the PDQ yet, so I have to install Revit on multiple computers. s and my current method is a bit labor intensive. My current method is to update to the latest version using the auto-update feature. It takes a very long time (about 1 hour) and has several problems. I am getting an error when I try to upgrade to the latest version: "Unable to get upgrade certificate". If I don't update I get an error: "Cannot get configuration file". I also got an error when I tried to update to the latest version: "Unable to sign in". fffad4f19a
