About Us We are a group of friends that are interested in many things. Reading being the main one, but there are also travelling, movies, computer programming, and a bunch of other things we love. Hope you like the site and come back often!UPDATE: Since I originally posted this article (May 23, 2018) there have been several announcements from Microsoft about support for Bitcoin in the Microsoft Store and for Azure Bitcoin. There will be more announcements coming regarding Azure Bitcoin, and I will be updating this article. Microsoft Azure is a highly competitive and technically powerful cloud computing service that is utilized by a number of companies for diverse uses. It's not unusual to find Microsoft Azure being utilized in edge applications for Bitcoin companies such as Bitpanda, AtlasPay, BitPay, and BitWage. Azure has a number of important Bitcoin-related components and features. Microsoft Azure and the Microsoft Network Microsoft Azure has a number of features and services that give it a significant advantage over other cloud service providers. Among many other features and services, Azure provides a powerful VPN service and peer-to-peer technology that allows secure access to Azure services from anywhere in the world. Azure also includes dedicated support for BitTorrent ("Azure BitTorrent") for mission-critical applications. Azure supports virtual machines, which makes it very useful for development purposes. Many Bitcoin companies are also using Microsoft Azure for various reasons: Build and deploy various types of cloud applications Deploy various types of cloud applications Manage various types of workloads Manage various types of workloads Microsoft has a relatively large Bitcoin-related group of employees and frequent announcements d4474df7b8
