## Solidworks 2009 Portable 1 Link birmar

This page is intended to aid those who want to use Solidworks as their CAM software. In particular, it is intended to aid those who want to make a portable Solidworks model. For a guide on how to make a portable Solidworks model, please see my Solidworks 2009 portable 1 link. Introduction The Solidworks 2009 portable 1 link is a simple step by step guide showing how to use your computer and your keyboard to import a model and to export the model as a DAE file. If you have problems using this guide or have any questions, please post a comment. Solidworks 2009 portable 1 link This guide will show you how to: Make a Solidworks model. Export the model as a DAE file. Make a Solidworks 2009 portable 1 link. Make a portable Solidworks model The first thing we need to do is to open the Model Browser. To do this, go to File -> New -> Solidworks File. When the Solidworks 2009 portable 1 link comes up, select the button to open the model browser: Your model browser should now be opened and you will see your model in the center. Now click on the triangle in the top right hand corner and the Solidworks 2009 portable 1 link should open in a new window: You now need to bring the model into the Solidworks 2009 portable 1 link. First, drag the model into the Solidworks 2009 portable 1 link window. The white diamond shaped icon should appear in the center of the Solidworks 2009 portable 1 link window. Next, press the space bar and click on the import button to the left of the Solidworks 2009 portable 1 link: You should now see your model appear in the center of the Solidworks 2009 portable 1 link window: When you are happy with the model, click on the Export button. You will now see the Export DAE File window: Select the model and click on the Export DAE File button in the window's top right corner: When you are happy with the DAE file, click on the Run button. The Solidworks 2009 portable 1 link window will close and the DAE file will be saved to your computer. You can now delete the model from your computer. Export your model as a DAE file Open the Model Browser window again. Now click on the Export button in the top right hand corner. You should now see the
