Biff!: New Biff! . . gaupess Category:Argentine guitarists Category:Male guitarists Category:Argentine emigrants to Chile Category:Argentine rock musicians Category:1956 births Category:Living people Category:Argentine expatriates in Chile Category:20th-century Argentine guitarists Category:21st-century guitarists Category:Argentine musicians Category:20th-century male musicians Category:21st-century male musiciansQ: Returning json object with dynamic keys I need to create the json object that is presented below { "id": "user_1", "email": "john@company.com", "firstname": "John", "lastname": "Doe", "username": "john.doe" "points": "32" } The thing is that the keys of the json object can be different, so I can't hard code the keys. I tried using this in my php file: \$json['id'] = \$row['id']; Then when I try to create the json object I use echo json_encode(\$json); But the json object that is returned is not like the one that I need. I tried using this, I'm getting the json object fine, but it's not structured like the one I want \$row['id'] = \$id; \$row['email'] = \$email; \$row['firstname'] = \$firstname; \$row['lastname'] = \$lastname; \$row['username'] = \$username; \$row['points'] = \$points; \$json = array('id' => \$id, 'email' => \$email, 'firstname' => \$firstname,
