However, the linkMaker Cracked 2022 Latest Version application doesn't use the keyboard as input, so you won't need to use these keys to create the shortcuts. LinkMaker is free and has all the features that you might need, but it does have a few limitations. The software doesn't generate shortcuts for network drives, and it doesn't support Unicode characters. This makes it less useful if you plan on using it to generate advanced shortcuts for files and folders.
