There is almost nothing more annoying than having your important files mysteriously deleted from your computer. Not only are they irretrievable, but they could have been saved to a portable flash drive or external hard drive if they had been backed up. The Spesoft Backup utility allows you to back up your valuable files, and then recover them as well. The application can perform scheduled backups, as well as backups of a single file or folder. The application also allows you to specify how often the backups are performed, where they are stored, and also allows you to perform a restore of files and folders. The Spesoft Backup application is a great tool to use if you need to ensure that you have your files backed up regularly. It will also provide the ability to recover your files, and give you a command line that you can use to schedule the backups. Supported Operating Systems The Spesoft Backup utility is supported on Windows platforms with different languages and supports systems with a minimum of Windows 2000, Windows Vista, Windows 7, Windows XP, Windows 8/8.1, Windows 9, Windows 10, Windows Server 2008, 2012 and 2016. Spesoft Backup Features The Spesoft Backup application supports many different languages. These include English, French, German, Spanish, Italian, Polish, Russian, Japanese, Simplified Chinese, Korean, Brazilian, Brazilian-Portuguese, Hindi, Italian and French. The English version should be the only language version of Spesoft Backup installed on the computer or tablet. The application also works with Android, iOS and Windows Phone. While it is included with Spesoft, it is not necessary to purchase the application.
