You can use the following key to quit the Autocad.exe command-line tool: The closes the command window

## What's New In?

Rapidly create layer-based, scalable, and adjustable parts. Use dynamic geometric constraints to rapidly build scaled, layered, and adjustable parts. (video: 1:30 min.) Use the new drawing methods like Extend and Build to generate scalable and adjustable parts quickly and accurately. (video: 1:15 min.) Expression Web 5: Autodesk and Microsoft recently announced that they have joined forces to develop and deliver free web browsers that will work on Windows, macOS, and Linux with virtually no footprint. The browsers work best with AutoCAD and AutoCAD LT for the following features: Access popular websites like Bing, Maps, YouTube, and Netflix Manage your email, sign into websites and apps, and share files Create documents, presentations, and spreadsheets using Microsoft Office Web Apps Create media files using Microsoft Edge to view video and play audio files Navigate between websites using the browser's bookmarks, favorites, and tab feature Open or save files Create and edit spreadsheets and presentations Crop and edit images and photographs Import and export files using the web browser's File Manager and File Upload Rapidly and easily navigate between documents with all your tabs Quickly share files with a click using Windows and Mac file-sharing Create web widgets, games, and apps that work with the web browser's API The browsers are now available for free at windows.microsoft.com and mac.microsoft.com. The AutoCAD Platform and Design Management Services team is adding new features and services for the free web browsers. This includes: View, edit, and open CAD files from the web browsers Create, modify, and open CAD files on the web browsers The websites are designed to work with the AutoCAD and AutoCAD LT applications. The Windows web browser includes "Project Spartan," a new web browser from Microsoft, which is designed to work with everything from email to the Edge web browser. Project Spartan has been designed for efficiency and performance, and will use the latest Microsoft technologies to deliver a unique browsing experience on Windows. AutoCAD LT web browsers, which are based on Internet Explorer 11, include the latest version of Adobe's InDesign and Photoshop technologies, as well as the latest versions of the mobile version of these applications: For
