How to: Check for Windows
Installer Viruses. Q: nginx
configuration issue with website
routing I am creating a website
with Python/Flask. Since I am a
noob in Python/Flask, I am
trying to use nginx as a reverse
proxy. Here's the issue. When I
go to the website I want, I get
redirected to nginx main index
page. And I know the issue is
that I need to add something to
my nginx.conf but I just don't

know how it is done. I have only seen people with templates.

Anyways, if anyone could provide a sample config, it would be much appreciated.

Thanks! A: Try reading this tutorial if you want to get familiar with nginx configuration: Also, don't forget to add this to your nginx.conf:

```
location ~ / { proxy_pass
```
