Unzip the downloaded file in your system's Temp folder. 2. Run it. ASpurgo Remote Control is an all-in-one software package designed

---

to control the functions of any remote desktop and running software using a keyboard/mouse (or computer) on a computer, PC or Laptop is much more simple and secure than using a program like screen sharing. With ASpurgo Remote Control software, you don't have to deal with different software to control the remote desktop software. ASpurgo Remote Control has been conceived with the solution of the main users' requests: - Control several remote clients in a row - Run several apps at the same time - Control two or more computers at the same time from a single computer - Automate complex commands ASpurgo Remote Control allows you to set up, run, pause, stop applications, and start up and shutdown the client remotely. ASpurgo Remote Control software uses only the mouse and keyboard to control. ASpurgo Remote Control management functions are as follows: - Ctrl-left, Ctrl-right and Ctrl-up/down movement management - Start up, stop, pause, and run any application - Automatically start a specified application - Import and export macros - Command box management - Run specified applications in the terminal environment - Run specified applications in the desktop Actions: - Keyboard - Mouse - Run and stop programs - Open and close programs - Show/hide the application list - Import/export macro - Add, edit, delete, and modify macro - Select, and delete both running and

---

non-running programs - Start application, open a file, or open an URL directly - Execute entire commands or a part of them - Running time management - Control the running time - Execute the commands of the multiple file selected or the group of the specified files - Show the running program bar - Show the running process - Control the current opened application - Run the selected application in the
