System Requirements:

Quake IV ran great on all computers I tested it on, and with the new Direct3D API, it runs even better. Unfortunately, this game does not run well on computers that run Windows Vista (64-bit) or Windows 7 (64-bit). Try running a 32-bit OS, or use the Direct3D 9 API. Conclusion: Quake IV on the Mac is very much worth trying out. This game is an amazing testament to game developers and Mac users who continue to provide improved versions of graphics and networking for Mac OS.
