FreeWebLinkSubmitter Crack + (LifeTime) Activation Code [Win/Mac] [Updated-2022]

FreeWebLinkSubmitter Crack Mac is a lightweight Windows application developed specifically for helping users use the POST request method for submitting URLs to the Internet biggest search engines and requesting WHOIS information. It sports a user-friendly interface that allows you to perform most operations with minimum effort. The program gives you the possibility to create a list with URLs, edit or delete each URL, as well as submit the selected URL. FreeWebLinkSubmitter offers support for batch processing, which means you can add multiple URLs and process them at the same time. When it comes to setting up the POST data, you are allowed to provide details about the name and value of the parameters. Additionally, each POST parameter can be edited or deleted.

Another notable characteristic worth mentioning is represented by the possibility to save the information to XML file format, so you can upload it in your future projects. Since it doesn't require much computer knowledge to work with this utility, even rookies can master the entire process with minimum effort. During our testing we have noticed that FreeWebLinkSubmitter carries out a task quickly, and no errors showed up throughout the entire process. It leaves a minimal footprint on system resources, so the overall performance of the computer is not affected. To sum things up, FreeWebLinkSubmitter offers a simple yet efficient software solution for helping you submit your data using the POST requesting method. Thanks to its intuitive layout, it is suitable for all types of users, regardless of their experience level.
