Photoshop 2022 (Version 23.2)

Photoshop Elements is a watered-down version of Photoshop and Photoshop Elements Pro is its premium version. It has no command line and lacks the tools that are commonly used in photo editing. The basic editing tools are limited to a single-layer mode (you cannot create a new layer in one instance and merge it into another) and although some Photoshop features are included in Elements, most are not. I would say that Elements is the best option for amateurs and photographers who don't have a great deal of artistic experience. FERGUSON, MO – The Ferguson Police Department released a police report they said supported the defense that Officer Darren Wilson had in the death of Michael Brown. The report addressed the shooting of Brown on August 9, 2014. Wilson shot Brown after the unarmed teenager allegedly shot at Wilson. The report said it was Wilson's judgement to use his service weapon. The report also denied that Brown was shot in the back. The report said Brown was shot in the chest when Wilson was out of sight of Brown, and said, "The trajectory of the fatal wound was a shallow entry wound into the top right side of the chest. The report also said Brown changed his direction immediately before he was shot, which the report said created a "strategic advantage" for Wilson. The report says Wilson was about 20-25 yards away from Brown and that the two were standing 5-7 feet apart when Wilson fired. A grand jury declined to indict Wilson in October. 34.076954 -90.322912
