## **JMovieManager**

jMovieManager 1.1.1 is the latest version of the jMovieManager, a very useful application. With a clean and well-organized interface, jMovieManager allows you to quickly load your existing movies collection, but it also allows you to add new movies to the database. At the same time, the application has some interesting movie related features, such as getting automatic IMDB information for the selected movie, displaying an up-coming cinema movies release calendar, getting a list of recent movies and a detailed description of the selected movie. jMovieManager also provides you with useful information, such as the main actor and the director for the selected movie. So, the application can be used as a versatile movie manager. Regarding the user interface, jMovieManager is very well organized and user-friendly, with an intuitive and user-friendly interface. To add a new movie entry, you need to specify the original title, the publisher and the director. There are various options, including author, cast, genre and online rating. Once you have inserted the movie in the database, you can view other related information such as the thumbnail of the movie, the IMDB rating, the original name of the movie as well as the title of the movie. jMovieManager allows you to select your favorite movie title and make it into the 'Favorite' list by clicking the 'Online Info' button, which displays all of the movies that have been selected. So, you can easily get a more detailed look at a specific movie with the help of the available information, such as its duration and the number of points that it has been rated. All movies related data can be viewed on the 'Media' tab, which allows you to view if any audio and video requirements are needed, such as if they are available online. Another useful feature of jMovieManager is the Calendar option, which allows you to easily navigate to the most up-coming cinema releases, as well as the top rated movies. jMovieManager helps you to organize and manage your movie collection by providing you with a wide range of features, as well as a clean and well-organized interface. DoodleJump 3D v3.04 is the latest version of the DoodleJump 3D for Android. DoodleJump 3D combines the best aspects of casual game genres like match-3 or classic casual games with a unique, physics-based jumping gameplay system. The levels are fully 3D
