
Solucionario 3ra Edicion Irving Shames Dinamica

A 10-pound block has an initial velocity of 10 fps on a smooth plane. , Force $F = (2.50 \text{ pounds}) \cdot t$, where t is in seconds, acts on the block for 3 s, ... F . The force with which the block will act on the person's hand is equal to , where W is the force of gravity acting on the human body, and w - the force of gravity acting on the block. The block and the person's hand will act for 3 s, resulting in a force of . But it shouldn't work like this. In this case, the block should not move. The block must be stationary. We can think of the block as a spring, but that's only if the entire force acting on the block is zero. How can we calculate the force acting on the block?
