The Individual Biography in the US. 1989) (New York: Rupa.Q: cxf dynamic client(providers) I'm using CXF DynamicClientProvider (JAVA plugin) to create a dynamic client stub that I use in another module. Objective : Create a module which dynamically creates jaxrs/cxf client stubs based on information given by user. I would like to know how to achieve something like that? Is that even possible using this plugin? Is there another better suited Java Client Provider solution? Thanks in advance A: Dynamic client providers allow you to easily create clients based on your custom logic - something that is much more difficult to do in CXF. You could, however, write your own custom client provider (in the same way as CXF provides basic providers) that could be configured to use your own XML or WSDL based endpoint to create clients. This would be much more involved. Q: Incrementing Variable within a For Loop I'm having some trouble understanding why my code is not incrementing my count as expected. Currently it is returning 1 when I would like it to return 2. The code that I'm referring to below is: `int valid = 0; ArrayList recievedValues = recievedData; int count = 0; for (int i = 0; i < 6) { String recievedValue = recievedValues.get(i); valid = recievedValue.replaceAll("[^\\d\\d-\\-`
