Five animated cutscenes are created using motion capture data, which show the player interaction, animations, post-contact movements and body movements of these players. The animations include action shots of player attacks and interceptions as they happen in real-life. For example, if the ball is kicked forward in “real life,” the player will perform a downward or front jump. This approach allows gameplay to be more realistic by providing further cues about on-ball or off-ball actions as they happen in real life. HyperMotion Technology is available on all modes in the game. It is also available on the new Player Career mode, Ultimate Team, and The Journey. The HyperMotion Technical Trailer is available at Please note that many of the gameplay videos in this article are not available in all regions. Editors' Note: This article was originally published on Jan. 8, 2015 and has since been edited to reflect further information about FIFA 22, including the release date. It has been further updated to include links to video content of the game in the latest versions of the Xbox One and PlayStation 4. Multiplayer
