Note You can create multiple layers on the same canvas, but you should always keep in mind that they can't be saved to different images. If you close an image with multiple layers active, you must save it from the Layers Panel, just as if you were closing an image with multiple open layers. If you accidentally close an image with multiple open layers, you can reopen it and continue working on it as before. In the Layers Panel (Figure 3-4) you see your layer based images. When an image is open in Photoshop, there are four areas: History, Channels, Selections, and Layers. Figure 3-4. When you see an image open in Photoshop, it's always in one of these four areas. In this example, the image is in the Channels area.

Donate Honda – A taste of Mazda Five years ago Mazda was a mere afterthought for the world's automakers. Today the Japanese automaker is one of the premier players in the business, but can it withstand the onslaught of its arch rival? Sunsets and an endless sea of cornfields can only go so far toward comforting the soul, and many would just as soon leave the Midwest. But its been that way for a long time, and there's a good reason. The key to Mazda's success in North America is quite simple. Dealers offer an extensive line of products that can make the driving experience that much better. Mazda's brand strengths – their handling, power, and fuel economy are all terrific. The base models of the vehicles are sleek and nimble, with strong brakes and excellent steering, and most of them do far better than most of its mainstream competitors in the handling department. The Mazda6 The Mazda6 is perhaps the best value in the compact car segment. It features a low-slung stance and a well-balanced feel, and also provides seating for five. There are two engine choices, the turbo four and the naturally aspirated three. Both have good power, and both are well within the EPA figures of their class. The six is also extremely nimble and easy to maneuver in tight quarters. Coupe and sedan are both available, and they are reasonably attractive with their glass-alloy bumpers and lots of chrome trim. Inside there is plenty of room for five, and the leather seats come well upholstered. The electronics have a bit more of a clunky feel than what we're used to, and the infotainment system lacks the quick and easy functions of the competition, but for the money the Mazda6 is a very good choice. The Mazda3 The Mazda3 is for a lot of drivers a slam dunk. With its emphasis on fuel economy and a compact size, it makes a perfect commuter. The five-door hatchback offers seating for five, and there are an abundance of options for the driver. Powertrains include a choice of four-cylinder and naturally aspirated three-cylinder engines, each of which produce more power than the six. The turbo four is a potent option with 182 hp. All of these are engaging and enjoyable to drive, and they won't let you down on the road. The all
