Failed attempts of running the dll files downloaded from TSReader website: I am trying to run tsreader pro (complete version) in Win7 x64. It's a set of dll files. I've extracted those files to the folder which is located in "C:\Program Files\TSReader". Because I cannot find an "run.exe" file in it, I've written an "TSReader.log" file in it and then run it. And after that, TSReader still couldn't be run successfully because I get the error message as the one below: C:\Program Files\TSReader>tsreader.exe ERROR: Unable to access the video subsystem. TSReader needs a video driver which is not detected. Please select the following driver manually: And there is no driver named "Microsoft Visual C++ 2005 Driver Installer - Runtime" shown in the list which will be displayed. To be clear, I want to run tsreader pro and that is the full version of tsreader, not the lite one. Do you have any idea to fix this problem? A: Tsreader is a commercial program. You will not be able to freely download updates/upgrades using the free version of TSreader. If you want to test TSreader, I suggest you download the free version first and use it to test the features you need. An alternative is to use third-party options to get the most out of TSreader.
