I have written the code as mentioned below `def _parse(line): ... some code... if 'track' in line: print(line)` with `open('01234567.txt', 'r')` as `f`: for `line in f`: `print(_parse(line))` But, the output is as below. I mean the output is same line again and again. I know that for `loop/s` in Python can iterate over the file one by one. But in this case it is iterating only once with the same line over and over again.
